

Jewelry Care Instructions

Every day and General Care:

Store jewelry in a soft cloth bag.

Sterling pieces are best stored in an airtight bag to prevent oxidation.

If possible, avoid showering, exercising or swimming in your jewelry.

Sterling Silver:

Chains and components made in Sterling can be quick dipped into silver cleaner, rinsed in clear water and patted dry with a soft cloth.

Stainless Steel:

You do not have to care for your stainless chain or components.

If they become dingy with improper storage, clean them with mild dish soap and a soft toothbrush.

Antique and Vintage charms:

We do not recommend that you clean the charms.

With repeated wear, contact with skin and body oils will naturally polish the charms over time.

Since each charm is one-of-a-kind, it has endured its own patina and unique characteristics over the years.

You may notice certain areas that are rubbed away (from repeated rubbing during meditation or prayer). This makes the charm more special and valuable.

Repair:

We understand things happen, so if any part of your jewelry breaks, please contact us.

We can replace chains or repair broken components for a fee.

Unfortunately, we cannot guarantee replacement for lost antique or vintage charms.
